

# Engaging Students and Meeting Standards with Document Based Questions | DBQ

**Document-Based Questions | DBQs** are an excellent way to incorporate analytical thinking at all levels. Through the use of well- designed DBQs, educators are empowered to teach students to read, write, and think critically. DBQs provide teachers with a wealth of access to primary and secondary sources, which is what PA Core Literacy Standards require teachers to use. DBQs also tap into the analytical skills being asked of our students as they tackle evidence-based writing. Join us for this relevant workshop led by The DBQ Project experts themselves!

Registration includes a unit of choice and trial access to DBQ online.

**Registration:**
